Question 1 Correct	Write a program that prints a simple chessboard.
Marked out of	
3.00 F Flag	Input format:
question	
	The first line contains the number of inputs T.
	The lines after that contain a different values for size of the chessboard
	Output format:
	Print a chessboard of dimensions size * size. Print a Print W for white spaces and B for black spaces.
	Іприс
	2
	3
	5
	Output:
	WBW
	BWB
	WBW
	WBWBW
	BWBWB
	WBWBW
	BWBWB
	WBWBW

Question 2
                   Let's print a chessboard!
Correct
Marked out of
5.00
                   Write a program that takes input:
P Flag
question
                   The first line contains T, the number of test cases
                   Each test case contains an integer N and also the starting character of the chessboard
                   Output Format
                   Print the chessboard as per the given examples
                   Sample Input / Output
                   Input:
                   2
                   2 W
                   3 B
                   Output:
                   WB
                   BW
                   BWB
                   WBW
                   BWB
                   Answer: (penalty regime: 0 %)
                       1 || Winclude<stdio.h>
                       2 int main()
                       3 . {
                               int T,d,i,i1,i2,o,z;
                               char c,s;
scanf("%d",&T);
